

# Organic Farm Knowledge Newsletter

## October 2020

Dear reader,

The Organic Farm Knowledge platform ([organic-farmknowledge.org](https://organic-farmknowledge.org)) provides access to a wide range of tools and resources about organic farming that can help improve production. This range of tools will soon be expanding! The Board of Organic Farm Knowledge met recently to discuss the strategic development of the platform. We are working hard to expand the platform available topics as we recognize many important topics related to organic farming are currently missing. Some examples include sustainability, supply chain management, horticulture, among others.

We are pleased to share our second newsletter with you. Featured here are the latest tools, videos, events and news available on the platform. We look forward to sharing more news with you in November!

---

### New tools

- Guide for assessing the protein quality in soya feed products, OK-Net EcoFeed Practice Abstract, 2020 (EN): <https://organic-farmknowledge.org/tool/35520>
